

## Archangel Information

The four main Archangels in Angelology are Gabriel, Michael, Raphael and Uriel, but there are many others that you can call on to help and guide. Below I have listed the information associated with eight of the Archangels so that you can use the appropriate crystals, incense, coloured candles, elements or day to help you to tune into your chosen Archangel. These items can help to bring focus and calm. These simple rituals help you to be centered and feel more open to Angelic energies. Encounters with Angels are always positive and transforming, confirming your beliefs, as well as helping you to develop your skills of working with subtle energies, bringing light, love and wisdom into your everyday life.
